# Repro directive for digital printing

Please supply printing data as follows:

data:	Adobe InDesign, Illustrator or PDF (Version 1.4/Acrobat 5 or higher)
	(Of course we are able to process data from any other type of file)
document size:	1:1 or (1:10)
	(or other document size in consideration of width-to-height ratio and resolution)
resolution :	< 4 qm min. 100 (1000) dpi
	4 - 100 qm min. 50 (500) dpi
	> 100 qm min. 30 (300) dpi
plotting:	if there are elements which should be plotted, please create them as a vector graph. Picture data based on pixel could not be plotted
colour mode:	CMYK / colour space ISO Coated v2
proof:	we prefer a colour-binding proof referring to FOGRA standard with media wedge.
data supply:	CD/DVD or via website (http://upload.kldruck.de)

Please consider that we need generous trim edge (see illustration). Many products are hemmed, laminated or finished otherwise. According to application, up to 100mm could be necessarily.

examples of print product finishing:

textile print for frameless:	trim edge all round 15 mm
keder:	trim edge all round 10 mm
laminating:	trim edge all round 10 mm
car wrapping:	trim edge all round 100 mm
punching:	trim edge all round 5 mm

Special terms of reference for bracing, hemstitch etc. you will receive upon request from our sales.

With pleasure we submit individually prepared layout documents if required.
If there are still any questions left, don´t hesitate to ask us,
you will be advised on your questions or connected to our repro department.
